## **WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM.**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game—dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions—**IMMEDIATELY** discontinue use and consult your physician before resuming play.

### **WARNING**

#### **To Owners of Projection Televisions!**

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT (television screen). Avoid repeated or extended use of video games on large-screen projection televisions.

## USER CONTROL ROSTER

You can continue to adjust your team's User Control during the game until you find the best combination. (See User Control Roster page 16)

## *Pitching*

---

You can position a pitcher on the mound only before he goes into his windup.

Position Pitcher	D-Pad <b>left/right</b>
Throw Pitch	<b>C</b> (See Pitch Types)

The umpire's call appears on the screen after each pitch. The speed of the pitch appears after strikes that are not hit.

## PITCH TYPES

There are three types of pitches: fast balls, sinkers, and curve balls. You control the type of pitch as you throw it.

Fast Ball	<b>C + D-Pad down</b>
Sinker	<b>C + D-Pad up</b>
Curve to Left	<b>C + D-Pad left</b>
Curve to Right	<b>C + D-Pad right</b>

Pitch effectiveness is determined by a number of factors, such as the pitcher's position on the mound, velocity, control, and endurance ratings. (Pitchers often shows signs of fatigue after 4 innings on the mound.)

## PICK-OFF PLAYS

Keep an eye on the infield diagram to look for base runners taking generous leads. If it looks like a base runner is attempting to steal—pick him off!

Throw to First	<b>B + D-Pad right</b>
Throw to Second	<b>B + D-Pad up</b>
Throw to Third	<b>B + D-Pad left</b>

## *Fielding*

When fielding is human controlled, you must position your fielders to catch the ball and direct them to throw it. Genesis controlled fielders track and attempt to catch the ball, but throwing remains under human control.

## CATCHING A BALL IN PLAY

When the ball is in play, but before it has been caught, white crosshairs appear on the full-size field where it will land; the field diagram shows a white X in this spot.

Hard grounders and line drives are more difficult to catch than fly balls. You can catch a ball on the ground or in the air by making diving or jumping catches.

Diving Catch	<b>C</b> + D-Pad in any direction
Jumping Catch	<b>C</b>

## THROWING TO A BASE

Remember, even when your team's defense is controlled by the Genesis, *you* must direct your fielders' throws.

First Base	<b>C</b> + D-Pad <b>right</b>
Second Base	<b>C</b> + D-Pad <b>up</b>
Third Base	<b>C</b> + D-Pad <b>left</b>
Home Plate	<b>C</b> + D-Pad <b>down</b>

## RUN TO A BASE (RUN DOWN)

Throwing the ball to your teammate covering a base is not always an option—when a base runner is caught in a run down, you may have to tag him out and if a base is not being covered at all, you must direct your fielder to run to it.

First Base	<b>B + D-Pad right</b>
Second Base	<b>B + D-Pad up</b>
Third Base	<b>B + D-Pad left</b>
Home Plate	<b>B + D-Pad down</b>

## CHANGING FIELDER CONTROL

Sometimes you may want to select a specific fielder to make a play. This situation may arise when you need to make a jumping or diving catch.

- To switch control to your fielder nearest the ball, press **B**.

**NOTE:** Once a fielder is selected he remains stationary until you direct him to move.

## *Batting*

---

Each time a batter comes to the plate in a game, his name, Batting Average (AVG), Home Runs (HR), and Runs Batted In (RBI) appear on the screen. The pitcher begins his windup after this information disappears.

Position Batter	D-Pad in any direction
Full Swing	<b>C</b> (press and hold)
Check Swing	<b>C</b> (tap)
Bunt	<b>A</b> (press and hold)

## *Base Running*

---

Batters who make contact automatically run toward First base but won't try for extra bases unless you direct them to. Runners automatically circle the bases after a home run.

To run to a base:

Second Base	<b>B + D-Pad up</b>
Third Base	<b>B + D-Pad left</b>
Home Plate	<b>B + D-Pad down</b>

To return to a previous base:

First Base	<b>C + D-Pad right</b>
Second Base	<b>C + D-Pad up</b>
Third Base	<b>C + D-Pad left</b>

**NOTE:** Men on base try to advance on line drives and high pop flies, but they won't return to base until you direct them to.
